

CENTER FOR
TROPICAL AND SUBTROPICAL
AQUACULTURE

Letter from the Director

Aloha,

We here at CTSA would like to wish you and your families a very happy holidays filled with joy, love, and laughter.

As 2011 draws to a close, my staff and I are reflecting on the accomplishments from the past year of both our own in-house projects and our sponsored projects. In case you missed it, we redesigned our website to become more robust and user-friendly (www.ctsa.org). New features include an interactive map and a comprehensive farmer outreach section.

We also started a video series that highlights aquaculture activities and profiles aquaculture farmers in our region. To view the videos, please [click here](#) to be directed to the [Multimedia](#) section of the CTSA website.

In addition, we recently completed our [Annual Accomplishment Report](#), which contains detailed information on the outputs, outcomes, and impacts of CTSA funded research and demonstration projects. We will highlight the report in our next full issue of e-notes in January. Until then, Mele Kalikimaka me ka Hau'oli Makahiki Hou!

Mahalo,

Cheng-Sheng Lee
Executive Director, CTSA

The Center for Tropical and Subtropical Aquaculture (CTSA) is one of five regional aquaculture centers in the United States established and funded by the U.S. Department of Agriculture's National Institute of Food and Agriculture (NIFA) under grants 2007-38500-18471, 2008-38500-19435, and 2010-38500-20948. The regional aquaculture centers integrate individual and institutional expertise and resources in support of commercial aquaculture development. CTSA was established in 1986 and is jointly administered by the Oceanic Institute and the University of Hawaii.
